 - D. cheating

Question ID : 59445917623

Status : Answered

Chosen Option : 3

Comprehension:

Read the passage carefully and answer the questions that follow.

The government has ordered re-examination in the SSLC English II paper in a district.

In a statement in the Assembly on Wednesday, the Education Minister said that the invigilators in seven rooms of a higher secondary school had been given a packet containing the question paper for English II instead of English I on March 22. The mistake had been realized after more than 15 minutes and the question papers were withdrawn and deposited with the paper custodian.

Denying reports the the question papers had been 'leaked', the Minister speculated that the opportunity to make a fast buck out of the situation could have been made use of by some. He said enquiries by his department as well as the CID had revealed that the question papers reportedly 'leaked' and in circulation had nothing in common with the actual question paper.

The government had ordered a re-examination taking into consideration the possibilities of the invigilators remembering some of the questions in the 'leaked' paper.

Two officials have been suspended for the leakage of the exam papers, according to sources. They are the departmental officer and the custodian of the papers, both based at the district headquarters.

SubQuestion No : 21

Q.21 Choose the most appropriate option.

What is the main idea of the passage?

- Ans
- A. The difficulties faced by students in an examination
 - B. Suspension of government officials by the minister
 - C. The Education Minister's press conference
 - D. The reported leakage of an exam question paper

 - D. Logarithmic decrement

Question ID : 59445918282
Status : Answered
Chosen Option : 1

Q.41 According to the kinetic theory of gasses, the absolute zero temperature is attained because of:

- Ans A. Kinetic energy of molecules is zero
 B. Specific heat of gas is zero
 C. Volume of gas is zero
 D. Pressure of gas is zero

Question ID : 59445918311
Status : Answered
Chosen Option : 1

Q.42 The relative velocity of end B with respect to other end A in a rigid link AB is:

- Ans A. perpendicular to AB
 B. parallel to AB
 C. inclined to AB
 D. along AB

Question ID : 59445918256
Status : Answered
Chosen Option : 1

Q.43 Oscillations of a floating body are small when the metacentric height is:

- Ans A. Negative
 B. very small
 C. zero
 D. large

Question ID : 59445918298
Status : Answered
Chosen Option : 4

Q.44 Dimensions of surface tension are:

- Ans A. ML^0T^{-1}
 B. MLT^{-2}
 C. ML^0T^{-2}
 D. M^0LT^{-2}

Question ID : 59445918304
Status : Answered
Chosen Option : 3

Q.45 In electric discharge machining, better surface finish is obtained at:

- Ans A. high frequency & low discharge current
 B. high frequency & high discharge current
 C. low frequency & high discharge current
 D. low frequency & low discharge current

Question ID : 59445918349
Status : Answered
Chosen Option : 3

Q.46 A point at which the extension of steel material is faster than the load increment is:

- Ans A. Plastic point
 B. Breaking point
 C. Yield point
 D. Ultimate stress point

Question ID : 59445918271
Status : Answered
Chosen Option : 3

Q.47 A control system that measures certain output process variables and uses these to control speed and feed is called:

- Ans A. in-process control
 B. operator control
 C. adaptive control
 D. feed-back control

Question ID : 59445918354
Status : Answered
Chosen Option : 4

Q.48 Friction factor for laminar flow in a pipe is given by:

- Ans A. $Re/24$
 B. $Re/64$
 C. $16/Re$
 D. $64/Re$

Question ID : 59445918299
Status : Answered
Chosen Option : 4

Q.49 The vibration of a revolving shaft, at its nodal point is:

- Ans A. Double than at the ends
 B. Maximum
 C. Zero
 D. Minimum

Question ID : 59445918286
Status : Answered
Chosen Option : 3

Q.50 A Wheatstone bridge is used for electrical strain gauges, because it has:

- Ans A. high sensitivity
 B. low sensitivity
 C. zero sensitivity
 D. infinite sensitivity

Question ID : 59445918269
Status : Answered
Chosen Option : 1

Q.51 An imaginary circle on a gear which gives a rolling action, as same as the motion as the actual gear, is called:

- Ans A. Pitch circle
 B. Addendum circle
 C. Clearance circle
 D. Dedendum circle

Question ID : 59445918275
Status : Answered
Chosen Option : 1

Q.52 In a reverted gear train with four gears, two gears P and Q are meshing, Q – R is a compound gear, while R and S are meshing. The modules of P and R are 6 mm and 5 mm respectively. The numbers of teeth in P, Q and R are 24, 36 and 40 respectively. The number of teeth in gear S is:

- Ans A. 42
 B. 32
 C. 28
 D. 38

Question ID : 59445918276
Status : Answered
Chosen Option : 2

Q.53 Two cubical castings of the same metal and sizes of 2 cm side and 4 cm side are moulded in green sand. If the smaller casting solidifies in 2 mins, the expected time of solidification of larger casting will be:

- Ans
- A. 4 mins
 - B. 2 mins
 - C. 16 mins
 - D. 8 mins

Question ID : 59445918347
Status : Answered
Chosen Option : 4

Q.54 In a locomotive, the effect of "hammer blow" can be reduced by:

- Ans
- A. decreasing the speed and having pairs of wheels coupled together
 - B. uncoupling the pairs of wheels
 - C. increasing the speed
 - D. balancing whole of the reciprocating parts

Question ID : 59445918280
Status : Answered
Chosen Option : 1

Q.55 The carbon content in Tool Steels is:

- Ans
- A. 0.3 to 0.8%
 - B. 0.1 to 0.4%
 - C. 0.8 to 1.5%
 - D. 1.5 to 3.6%

Question ID : 59445918334
Status : Answered
Chosen Option : 3

Q.56 Ratio of indicated thermal efficiency to the corresponding air standard cycle efficiency is:

- Ans
- A. overall efficiency
 - B. net efficiency
 - C. indicated efficiency
 - D. relative efficiency

Question ID : 59445918322
Status : Answered
Chosen Option : 4

Q.57 In chemical machining, the etch factor is expressed as:

- Ans A. Undercut/depth of cut
 B. tool wear/ Workpiece wear
 C. Workpiece wear/tool wear
 D. Depth of cut/ Undercut

Question ID : 59445918351
Status : Answered
Chosen Option : 3

Q.58 Product of allowable bending stress and sectional modulus is

- Ans A. Radius of gyration
 B. Moment of inertia
 C. Moment of resistance
 D. Moment of rigidity

Question ID : 59445918264
Status : Answered
Chosen Option : 3

Q.59 The specific heat of a gas remains constant at all temperatures and pressures is discussed in:

- Ans A. Joule's Law
 B. Regnault's Law
 C. Charles' Law
 D. Boyle's Law

Question ID : 59445918313
Status : Answered
Chosen Option : 1

Q.60 A constituent makes the steel soft and less strength:

- Ans A. Cementite
 B. Ferrite
 C. Pearlite
 D. Austenite

Question ID : 59445918333
Status : Answered
Chosen Option : 2

Q.61 Which one of the dimensionless number is significant when studying surface tension phenomena in a flow problem?

- Ans
- A. Mach number
 - B. Weber number
 - C. Euler number
 - D. Froude number

Question ID : 59445918320
Status : Answered
Chosen Option : 2

Q.62 The pressure of fluid due to hammer blow is proportional to:

- Ans
- A. Inversely to density of fluid
 - B. Inversely to $\sqrt{(\text{density})}$ of fluid
 - C. Directly to $\sqrt{(\text{density})}$ of fluid
 - D. Directly to density of fluid

Question ID : 59445918305
Status : Answered
Chosen Option : 3

Q.63 The Notch sensitivity (q) is determined by the equation in terms of where K_f = fatigue stress concentration factor and K_t = theoretical stress concentration factor is:

- Ans
- A. $(K_f + 1) / (K_t - 1)$
 - B. $(K_f - 1)(K_t - 1)$
 - C. $(K_f - 1) / (K_t - 1)$
 - D. $(K_f + 1) / (K_t + 1)$

Question ID : 59445918288
Status : Answered
Chosen Option : 3

Q.64 Vibrations of transient in nature occurs in:

- Ans
- A. Undamped vibrations
 - B. Transverse vibrations
 - C. Damped vibrations
 - D. Torsional vibrations

Question ID : 59445918281
Status : Answered
Chosen Option : 3

Q.65 The product of Kinematic Viscosity and mass density is:

- Ans
- A. Specific viscosity
 - B. Coefficient of Viscosity
 - C. absolute viscosity
 - D. Viscosity index

Question ID : 59445918301
Status : Answered
Chosen Option : 2

Q.66 Spherical metal powders are produced by:

- Ans
- A. Automization
 - B. Reduction
 - C. Oxidation
 - D. Electrolytic process

Question ID : 59445918339
Status : Answered
Chosen Option : 1

Q.67 Side rake angle of a single point cutting tool is the angle:

- Ans
- A. by which the face of the tool is inclined towards back
 - B. between the surface of the flank below the point and a line drawn from the point perpendicular to the base
 - C. between the surface of the flank below the point and a plane at right angles to the centre line of the point of the tool
 - D. by which the face of the tool is inclined sideways

Question ID : 59445918342
Status : Answered
Chosen Option : 4

Q.68 In elastic collisions of bodies:

- Ans
- A. neither momentum of the colliding bodies nor the total kinetic energy are recoverable.
 - B. only the total momentum of the colliding objects is conserved.
 - C. both of the momentum and total kinetic energy are conserved.
 - D. only the total kinetic energy is conserved.

Question ID : 59445918258
Status : Answered
Chosen Option : 3

Q.69 The phase difference between transmitted and disturbing force for a negative isolation factor is:

- Ans
- A. 120°
 - B. 90°
 - C. 45°
 - D. 180°

Question ID : 59445918285

Status : Answered

Chosen Option : 4

Q.70 The vibration isolation for a forced vibration system is possible, when:

- Ans
- A. $\omega/\omega_n < 1$
 - B. $\omega/\omega_n > 2^{0.5}$
 - C. $\omega/\omega_n < 2^{0.5}$
 - D. $\omega/\omega_n = 1$

Question ID : 59445918283

Status : Answered

Chosen Option : 3

Q.71 A body of mass 100 kg with natural frequency 10 rad/sec has a critical damping:

- Ans
- A. 2000 N/m/sec
 - B. 1000 N/m/sec
 - C. 3142 N/m/sec
 - D. 10 N/m/sec

Question ID : 59445918284

Status : Answered

Chosen Option : 1

Q.72 The theoretical velocity of jet at vena contracta in terms of Head of water is:

- Ans
- A. $\sqrt{2(gh)}$
 - B. $2gh$
 - C. $\sqrt{(2g)h}$
 - D. $\sqrt{(2gh)}$

Question ID : 59445918303

Status : Answered

Chosen Option : 4

Q.73 Atmospheric pressure head is equal to:

- Ans A. Zero m of water
 B. 10.3 m of water
 C. 8 m of water
 D. 2.5 m of water

Question ID : 59445918295
Status : Answered
Chosen Option : 2

Q.74 In a pair of spur gear with external involute profile, the interference of tooth can be minimized by:

- Ans A. Decreasing pressure angle
 B. Increasing number of gear teeth
 C. Decreasing module
 D. Decreasing center distance between gear pair

Question ID : 59445918277
Status : Answered
Chosen Option : 2

Q.75 In the relation $VT^n = C$, the value of n for carbide tools is:

- Ans A. 0.20 to 0.25
 B. 0.25 to 0.40
 C. 0.40 to 0.55
 D. 0.1 to 0.2

Question ID : 59445918344
Status : Answered
Chosen Option : 3

Q.76 In deep drawing of sheets, the value of limiting draw ratio depends on:

- Ans A. thickness of a sheet
 B. type of press used
 C. percentage elongation of sheet metal
 D. yield strength of sheet metal

Question ID : 59445918348
Status : Answered
Chosen Option : 4

Q.77 The type of reamer used for reaming operation in a blind hole is:

- Ans A. No reaming possible
 B. left-hand spiral fluted reamer
 C. right-hand spiral fluted reamer
 D. straight fluted reamer

Question ID : 59445918345
Status : Answered
Chosen Option : 3

Q.78 A shaft is subjected to a bending moment 3 kNmm and twisting moment 4 kNmm, then equivalent twisting is:

- Ans A. 7
 B. 1
 C. 25
 D. 5

Question ID : 59445918290
Status : Answered
Chosen Option : 4

Q.79 Two walls of the same thickness and cross-sectional area have thermal conductivities in the ratio 1 : 2. If the ratio of temperature drop across the two walls is 2 : 3, what is the ratio of heat flow?

- Ans A. 1 : 2
 B. 2 : 1
 C. 1 : 3
 D. 3 : 1

Question ID : 59445918321
Status : Answered
Chosen Option : 3

Q.80 The lowest temperature occur in vapour compression cycle is:

- Ans A. Evaporator
 B. Compressor
 C. Expansion valve
 D. Condenser

Question ID : 59445918329
Status : Answered
Chosen Option : 1

Q.81 The velocity parameters within the given fields are same when:

- Ans
- A. Nusselt number are different
 - B. Nusselt number are same
 - C. Reynolds number are different
 - D. Reynolds number are same

Question ID : 59445918319
Status : Answered
Chosen Option : 4

Q.82 The angle of twist for the equivalent bar to spring is given by:

- Ans
- A. $6PDN/Gd^3$
 - B. $8PD^2N/Gd^4$
 - C. $16PD^2N/Gd^4$
 - D. $4PD^2N/Gd^4$

Question ID : 59445918292
Status : Answered
Chosen Option : 2

Q.83 The position of a particle which is confined to move along a straight line is $S = 4t^3 - 32t + 100$, where S is measured in meters and t in seconds. The time required for the particle to reach a velocity of 76 m/s from its initial condition at $t = 0$ is:

- Ans
- A. 3 sec
 - B. 9 sec
 - C. 12 Sec
 - D. 4 sec

Question ID : 59445918259
Status : Answered
Chosen Option : 1

Q.84 Cast iron pipes are manufactured by:

- Ans
- A. Die casting method
 - B. Centrifugal casting method
 - C. Lost wax method
 - D. Sand casting method

Question ID : 59445918340
Status : Answered
Chosen Option : 2

Q.85 The α iron has a crystal structure:

- Ans A. Close packed hexagonal
 B. Face centered cubic
 C. Simple Cubic
 D. Body-centred cubic

Question ID : 59445918336
Status : Answered
Chosen Option : 4

Q.86 One Ton refrigeration is equal to:

- Ans A. 3.51 kW
 B. 4.74 kW
 C. 7.12 HP
 D. 1.0 kW

Question ID : 59445918328
Status : Answered
Chosen Option : 1

Q.87 Euler's dimensionless number relates the following:

- Ans A. Pressure force and inertial force
 B. Viscous force and inertial force
 C. Inertial force and gravity force
 D. Viscous force and buoyancy force

Question ID : 59445918306
Status : Answered
Chosen Option : 1

Q.88 For power measurement, the following dynamometer is used when the speed is high and the viscous force is small:

- Ans A. Froude water vortex dynamometer
 B. Telsa fluid friction dynamometer
 C. Amsler dynamometer
 D. Rope brake dynamometer

Question ID : 59445918291
Status : Answered
Chosen Option : 4

Q.89 For a Mild Steel, the Engineering stress-strain curve and True stress-strain curve are looks similar up to:

- Ans
- A. Proportional limit
 - B. Ultimate strength point
 - C. Elastic limit
 - D. Yield point

Question ID : 59445918261
Status : Answered
Chosen Option : 3

Q.90 A barometer reads 765 mm of Hg. The atmospheric pressure is:

- Ans
- A. 0.51 bar
 - B. 7.65 bar
 - C. 3.82 bar
 - D. 1.02 bar

Question ID : 59445918310
Status : Answered
Chosen Option : 4

Q.91 When a fluid flows through various cross-sections, the Cavitation occurs because of:

- Ans
- A. High pressure
 - B. Low viscosity
 - C. High velocity
 - D. Low pressure

Question ID : 59445918308
Status : Answered
Chosen Option : 4

Q.92 Knock in a diesel engine occurs due to:

- Ans
- A. instantaneous burning of the first part of the charge
 - B. reduction of delay period
 - C. instantaneous auto ignition of last part of charge
 - D. delayed burning of the first part of the charge

Question ID : 59445918325
Status : Answered
Chosen Option : 3

Q.93 A circular disc is rolling on a straight path, then the instantaneous centre of rotation is at:

- Ans
- A. the centre of the disc
 - B. Infinity
 - C. their point of contact
 - D. the centre of gravity of the disc

Question ID : 59445918273
Status : Answered
Chosen Option : 3

Q.94 The boiling point of Refrigerant R-32 is:

- Ans
- A. -10°C
 - B. -52°C
 - C. -43°C
 - D. -76°C

Question ID : 59445918327
Status : Answered
Chosen Option : 2

Q.95 When a material solidify due to latent heat of fusion is known as:

- Ans
- A. Thermometry
 - B. Supercooling
 - C. Undercooling
 - D. Thermal arrest

Question ID : 59445918335
Status : Answered
Chosen Option : 3

Q.96 A column has an effective length twice the actual length, then the ends of column are:

- Ans
- A. hinged at both the ends
 - B. fixed at one end and free at the other end
 - C. fixed at one end and hinged at the other end
 - D. fixed at both the ends

Question ID : 59445918267
Status : Answered
Chosen Option : 2

Q.97 Which of the following mechanism has Coriolis component?

- Ans A. Four bar chains
 B. Slider crank mechanism
 C. Quick return motion mechanisms
 D. Gnome engine

Question ID : 59445918274
Status : Answered
Chosen Option : 3

Q.98 A pipe 500 mm in diameter is 981 m long. It delivers water at a velocity of 2 m/s. The loss of head when $f = 0.008$ is

- Ans A. 20.2 m
 B. 12.8 m
 C. 6.4 m
 D. 35.6 m

Question ID : 59445918307
Status : Answered
Chosen Option : 2

Q.99 In carbon dioxide moulding process, the binder used is:

- Ans A. Sodium silicate
 B. Sodium bentonite
 C. Phenol formaldehyde
 D. Calcium bentonite

Question ID : 59445918352
Status : Answered
Chosen Option : 1

Q.100 Austempering heat treatment process is practised to improve:

- Ans A. brittleness
 B. hardness
 C. toughness
 D. ductility

Question ID : 59445918337
Status : Answered
Chosen Option : 3
